

Iluka Resources

Dataset Merge

ILUKA

SNAPSHOT

Customer

Iluka Resources

Industry

Mining

Overview

Complete a dataset merge of old project related records.

Objectives

Analysis of dataset structure in source and destination;

Development of a migration schema to map the record types, additional metadata fields, security and location data from the source dataset to the destination;

Development of a records transfer script to meet the requirements of the schema;

Performing a test migration from a sample of records for testing and review purposes;

Final migration of records;

Review and repair of records in error; and

Dataset maintenance tasks including reindexing and removal of source dataset.

Services Provided

- Data Migration

The Client

Iluka Resources is involved in mineral sands exploration, project development, operations and marketing and is a major participant in the global mineral sands industry. Iluka is the largest producer of zircon in the world, with an approximate market share of one third, and is the second largest producer of titanium dioxide minerals.

The Background

Iluka had a main HP TRIM dataset, and a secondary dataset containing records from a specific project. All records from the second dataset needed to be merged into the main dataset.

The Challenge

The main challenge was ensuring that all the records were successfully migrated and merged into the main dataset.

The Information Proficiency Solution

Migrate second dataset into the main dataset, ensuring the preservation of metadata and revisions.

Business Benefits

The company now has a single dataset containing all the records and information relating to business operations, including all metadata and revisions allowing ease of searching and retrieval of information.

Information Management and Technology Professionals

Providing a range of services focused within the Information Management and Technology industry. We work hard to understand our client's requirements.

We have experienced and certified professionals throughout Australia, who are continuously maintaining their knowledge on relevant legislation, standards, best practice, current trends and technologies.

We supply and support a range of EDRMS and Scanning software solutions

We develop our own range of productivity and connectivity tools to extend your existing investment in ABBYY, Kofax, Content Manager and Records Manager (TRIM).

We have a quality reputation with all of our work being referenceable. Our clients engage us for our experienced teams, effective delivery, project management and outsource capability.

We strive to build lasting relationships with our clients, ensuring that we support continuous improvement and maturity of processes and systems.
